

Disconnect with a click. Model 980-HD Heavy Duty Quick Disconnect

Our **Model 980-HD Quick Disconnect™** has been redesigned to provide users with an easier method for releasing the mechanism. Now, with a simple push of a button, you can quickly disconnect one section of an orthosis from another.

By incorporating the **Quick Disconnect™** into cervical, spinal, lower and upper limb orthotics, orthotists can build modularity into any device. Sections of the orthosis can now be quickly removed or added as the needs of the patient vary.

980-HD

For over 75 years, Becker Orthopedic has led the industry with high quality, innovative orthotic components and central fabrication services.

Whether you are looking for conventional orthotic components, or the latest in orthotic technology, Becker Orthopedic has the right orthotic option for you.
