

The SpineCor

Dynamic Corrective Brace

SpineCor Accreditation Training Program:

Becker Orthopedic and the Spine Corporation requires all certified orthotists to participate in a SpineCor Accreditation Training Program before utilizing this product.

SpineCor Accreditation Training Program

Phase I (2 days) – covering Dr Coillard’s etiopathogenic concept of idiopathic scoliosis and the basic principles of scoliosis treatment using SpineCor Dynamic Corrective bracing. The program also covers the following topics:

- Clinical evaluation
- X-ray evaluation
- Radiological classification
- Corrective movement principles
- Brace fitting
- SpineCor Clinical Assistant Software
- The role of physiotherapy with Dynamic Corrective Brace treatment
- Treatment protocols

As well as gaining cutting edge knowledge on the subject of idiopathic scoliosis delegates will learn useful practical skills in the clinical and radiological evaluation of scoliosis patients.

15 PCE’s offered.

Phase II – this final phase of the SpineCor Accreditation program allows delegates to put theory into practice in their own facility. A SpineCor trainer will guide the delegate through initial patient treatments developing, further, the skills taught with each patient treated. After the completion of Phase II the delegate will receive Certification as an Accredited SpineCor Treatment Provider.

If you would like to attend one of our training programs, please contact Theresa Mozak at (800) 521-2192 for scheduling. Thank you for your interest in SpineCor.
